

STAFF NEWSLETTER *September 2026*

HELLO TEAM!

Thank you for your continued hard work, care and commitment. These important updates and reminders help keep our clients safe, support you in your role and ensure we meet our responsibilities to the Local Authority, CQC and the Government.

*Together, we care.
Together, we make a difference.* 

1 CLIENTS WITH DEMENTIA

Please make sure you read the care plans. We put a **Δ** next to the name of a client with Dementia.

Food and drink should be made and put in front of them.

Do not accept that they have eaten without proof, especially if the care plan specifically asks for the food and drink to be made for them and put in front of them.

Make, present and ensure food and drink are in front of the client and do not assume they have eaten without proof.

2 NAILS & PPE

The Infection control laws are being more specific and targeting care workers.

- Nails should be of a reasonable length and are not meant to be painted.
- Use PPE and change gloves after personal care, before food prep and before giving medication.
- Do not use the same gloves.
- When washing hands you should be scrubbing from the elbow down.
- Please make yourself aware of the latest Guidance of Infection Control and PPE.

Follow Infection Control guidance at all times. Keep yourself, our clients and others safe.

3 LOGGING IN AND OUT

As stated before, we are now having to report to the Local Authority as they have asked to see your logins.

We are auditing these daily and if the same people consistently forget to log in or out then we will have to follow disciplinary procedures with those people.

We are trying to stop the Council forcing us to go Minute By Minute, however they are discussing this as the true logins are not being shown.

Please make sure you log in when you arrive and log out when you leave every visit.

It protects you, your colleagues, our clients and our funding.

4 FLU VACCINATIONS

If you have had your Flu Vaccination this year can you inform us as we have to report to the government on a monthly basis.

Please let the office know once you have had your Flu Vaccination.

5 MEDICATION THEMES

From our daily medication audits we have picked up some standard themes.

1

Carers are not selecting the correct outcome – if the outcome is not listed on the client's medication then please let us know so we can amend the system.

2

We are getting good reports of medication that may have ended, but we rely on you to inform us as the GP's and families sometimes take too long to inform us.

Please check, mark and record medication accurately and inform us of any changes.

Thank you!

Your professionalism, attention to detail and commitment make a real difference every day. **Together, we keep our clients safe.**
